SMALL COMPANIES ARE CREATING THE MOST JOBS IN THE U.S.

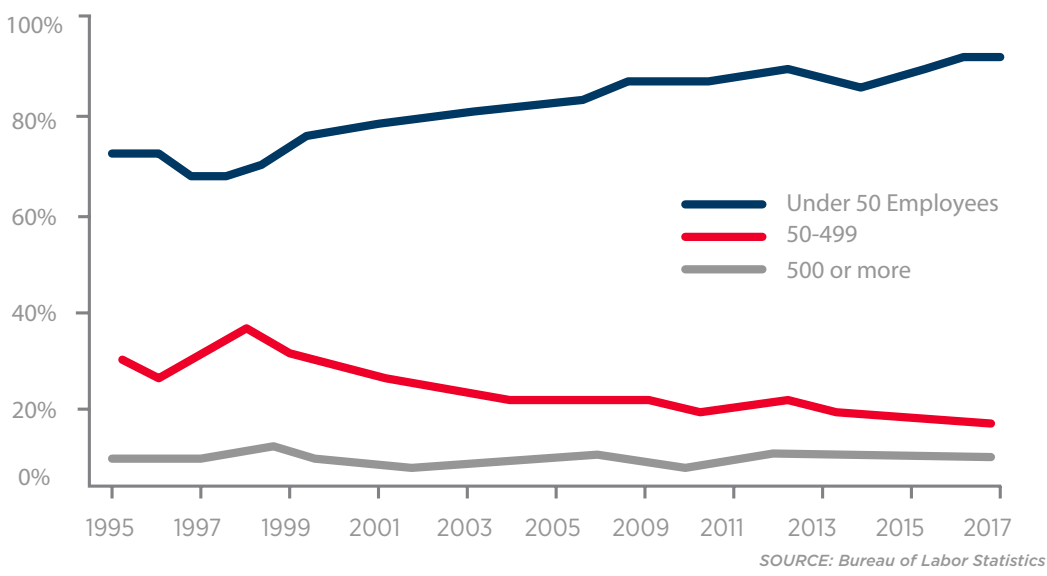

Q1 2019 | JANUARY

9 OUT OF 10 JOBS IN THE U.S. ARE CREATED BY SMALL COMPANIES. Companies with fewer than 50 employees are also driving job growth in office-using industries. Startups continue to generate demand for coworking space, which offers flexible leasing solutions that allow startups to quickly expand and support their growth. While a coworking provides temporary workplace solution, many technology firms are seeking more permanent offices. Technology firms accounted for 34.4% of U.S. office leasing volume in 2018, by far the largest segment. The next closest was financial services with 18.8%.
